DETAILED ACTION***Allowable Subject Matter***

Claims 1-3 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art references, alone or in combination, do not show a semiconductor device comprising a semiconductor package including a second terminal provided on a second main surface, a substrate having a fourth main surface with a fourth terminal provided at the fourth main surface, a metal substrate electrically connected to the second terminal and having a sixth main surface, a metal fixing member contacting the sixth main surface to position the metal substrate, the substrate provided with a hole passing through, wherein a portion of the fixing member is inserted into a hole and a tip of the fixing member contacts the fourth terminal. The closest reference (Nakamura JP 11-204679 A) only shows (fig. 9) that a metal fixing member (123) contacts a sixth main surface of a metal substrate (124) and contacts an upper surface of a substrate (125) but does not show that the metal fixing member is inserted into a hole passing through the substrate and contacting a fourth terminal (on the bottom of the substrate).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakamura (JP 11-204679 A), Houghton et al. (US 6,282,095 B1), Tamba et al. (US 5,920,119), and Tarter et al. (US 6,512,675 B1) also show semiconductor devices having fixing members to position a metal substrate.
